Epilog Software Suite Instructions

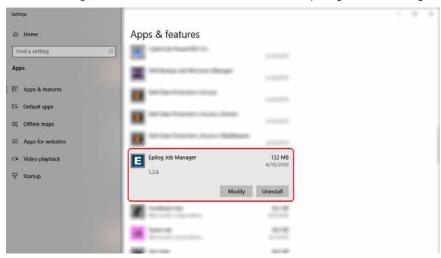

The Epilog Software Suite consists of the Job Manager & Dashboard. The Software Suite is a powerful new tool that will quickly become one of your favorite features on your laser system. From one piece of software, you can access any job you have sent to the laser, view the settings you used on any past job, re-run projects, access your material database, and much more.

• Windows 7/8/10 is required to use the Epilog Software Suite

Uninstalling the Previous Job Manager

If you have installed a previous version of the Job Manager on your computer, you must uninstall it first before you continue.

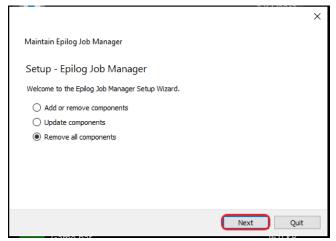

1. Go to Control Panel > Programs and Features and click on Epilog Job Manager

2. Click "Uninstall" and confirm if asked again.

3. Select "Remove all components" and then click "Next".

4. Click "Uninstall".

5. Click Finish to complete the uninstallation of the previous Job Manager.

How to Install the Epilog Software Suite

- 1. Go to <u>epiloglaser.com/drivers</u> and select the Epilog Fusion Edge. Then click on the Epilog Software Suite to download the installation file.
- 2. The installation file will download as a .zip folder that will need to be extracted. Right click the folder and click "Extract All". Once finished, double click on the **EpilogSuite** file.

Note: Make sure that the "Ghostscript" folder included in the download is always in the same location as your Epilog Suite installation file, or the installation will not be able to complete.

Sho	Please read the following license agreement. You must accept the terms contained in this agreement before continuing with the installation.	
	Ghostscript License	^
	 Preamble: The GNU Affero General Public License is a free, copyleft license for software and other kinds of works, specifically designed to ensure cooperation with the community in the case of network server software. The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, our General Public Licenses are intended to guarantee your feedom to share and change all versions of a program-to make sure it remains free software for all its users. When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you I accept the license. 	~

11. Select whether or not you want to run the program now. Click **Finish** to complete the installation.

12. An icon for the Job Manager will be automatically added to your Desktop. You are now ready to use the Job Manager.

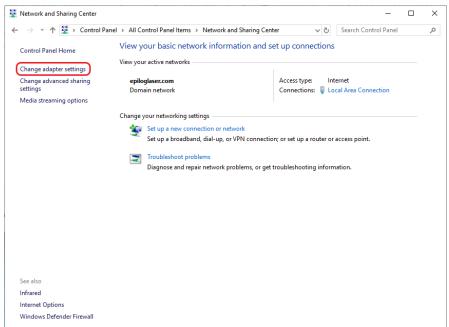

Windows 8/10: Ethernet Installation

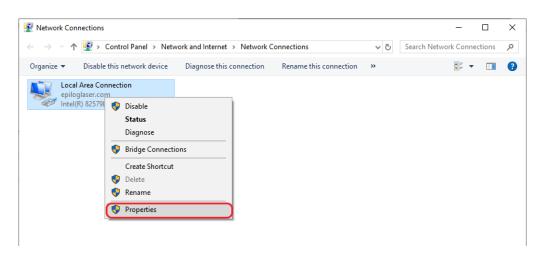

Set Up TCP/IP Address in the Computer

Go to your Network and Sharing Center in your computer's Control Panel.

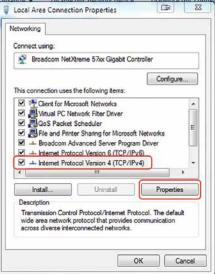

1. Click Change Adapter Settings.

2. Right click Local Area Connection, then click Properties.

3. Select Internet Protocol Version 4 (TCP/IP). Make sure you do not select Version 6. Then click Properties.

4. Select Use the following IP Address. Type in the following IP Address: 192.168.3.3.

This number is not an error; the last digit of the IP address in **this window must be different than the IP address you set in the laser.**

5. Type in a Subnet Mask of **255.255.255.0**, then click **OK**.

The IP Address on your machine should also match the IP Address on the Job Manager. For more information, see "USB Connection" on page 17.

Troubleshooting the Job Manager

If you were unable to install the Job Manager, it's possible that your Anti-Virus software is blocking installation. To disable Symantec Anti-Virus software, choose **Options**. Other anti-virus packages should have something similar to Symantec.

Disable all Virus and Spyware Protection Features. After the Job Manager has been installed go back into your Anti-Virus software and re-enable the setting that was disabled.

Important Job Manager Notes

Warning: Before activating your laser, install the newest version of the Software Suite to properly associate the correct machine with the Job Manager.

We suggest a minimum of **1 GB of free RAM** space when managing very large engraving and vector jobs.
