## Windows 7:
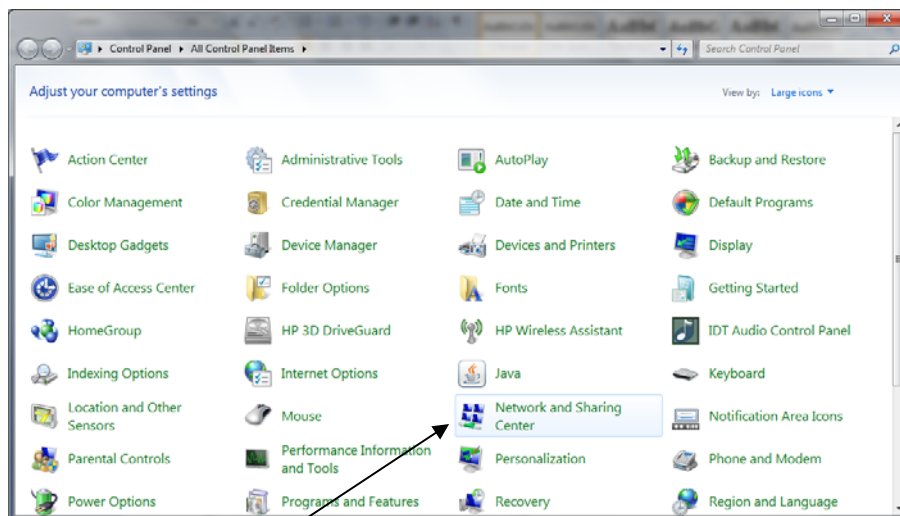

Setting up the TCP/IP Address in the Computer

Windows 7 uses a slightly different, but very similar protocol than previous versions of Windows to install the TCP/IP address in your computer. These instructions will guide you through the Windows 7 protocol.

Once you have set the IP Address at the laser, you will need to set the TCP/IP address on your PC.

From the Start menu at the bottom left corner of your PC monitor, select **Control Panel**

Click on **Network and Sharing Center**

View your basic network information and set up connections

Control Panel Home

Manage wireless networks

Change adapter settings

Change advanced sharing settings

View your active networks

You are currently not connected to any networks.

Connect to a network

Change your networking settings

Set up a new connection or network
Set up a wireless, broadband, dial-up, ad hoc, or VPN connection; or set up a router or access point.

Connect to a network
Connect or reconnect to a wireless, wired, dial-up, or VPN network connection.

Choose homegroup and sharing options
Access files and printers located on other network computers, or change sharing settings.

Troubleshoot problems
Diagnose and repair network problems, or get troubleshooting information.

Connect using:
Realtek PCIe FE Family Controller

Configure...

This connection uses the following items:
- ☑ Client for Microsoft Networks
- ☑ QoS Packet Scheduler
- ☑ File and Printer Sharing for Microsoft Networks
- ☑ Internet Protocol Version 6 (TCP/IPv6)
- ☑ Internet Protocol Version 4 (TCP/IPv4)
- ☑ Link-Layer Topology Discovery Mapper I/O Driver
- ☑ Link-Layer Topology Discovery Responder

Install...   Uninstall   Properties

Description
Transmission Control Protocol/Internet Protocol. The default wide area network protocol that provides communication across diverse interconnected networks.

OK   Cancel

Highlight **Internet Protocol Version 4 (TCP/IP)** and then click on **Properties**
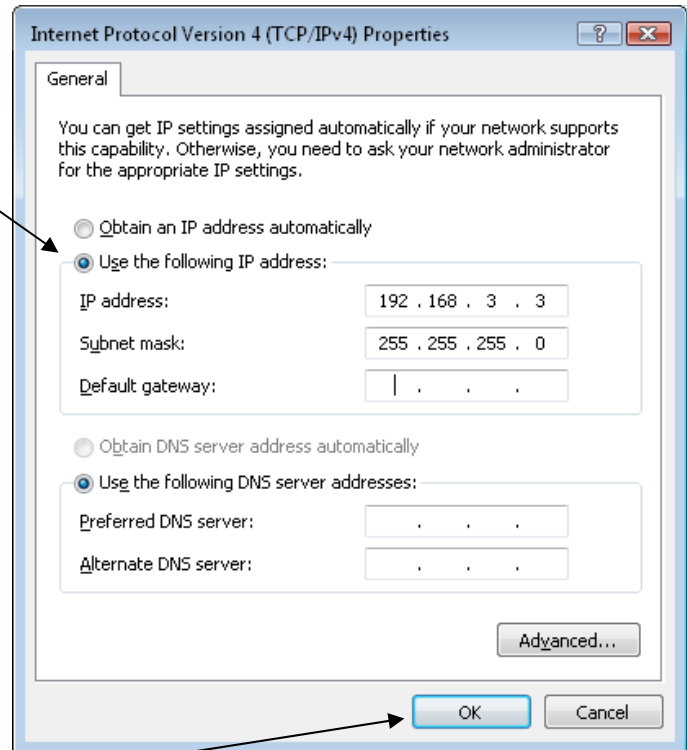

Select *Use the following IP address:*

Type in the following IP Address and Subnet mask:

192.168.3.3

255.255.255.0

You can leave the Default gateway blank.

This number is not an error; the last digit of the IP address in this window must be different than the IP address set in your laser system.

Internet Protocol Version 4 (TCP/IPv4) Properties

General

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

○ Obtain an IP address automatically
● Use the following IP address:

IP address: 192 . 168 . 3 . 3
Subnet mask: 255 . 255 . 255 . 0
Default gateway: .   .   .

○ Obtain DNS server address automatically
● Use the following DNS server addresses:
Preferred DNS server: .   .   .
Alternate DNS server: .   .   .

Advanced...

OK   Cancel

Click the **OK** button in this window and then click on the **Close** button in the next window.

That's it! The IP Address in your computer is set. Your computer will be able to talk to your laser after you install the print driver (which is the next step).
